Budget Growth & Forecast

The City's total expenditure budget has grown consistently year over year, averaging approximately **3.25%** annual growth from FY2021 through FY2025. Extending that trend forward, FY2026's budget is projected to reach approximately **\$31.6 million**.

Revenue Trends

Property Tax remains the City's largest revenue source, totaling roughly \$50.8M in actual collections over the five-year period, followed by Sales Tax at \$35.3M. December is consistently the City's highest revenue-collection month each year, driven by property tax billing cycles, with December 2024 representing the single highest month on record. While Sales Tax is not the largest revenue source overall, it is the strongest performer relative to its own budget, consistently exceeding projections — a positive sign of stronger-than-expected economic activity. By contrast, Fines & Forfeitures revenue is trending below budget, warranting a review of whether current budget assumptions for that category remain realistic.

Departmental Spending

Police represents the single largest share of departmental spending (about 33% of the total budget) and also shows the largest dollar overspend of any department, exceeding its budget by \$1,464,857 over the five-year period. Fire is the second-largest overspend at \$1,185,296. It would be in the City's interest to conduct a deeper review of why these two departments are consistently running over budget, to better inform next year's budget planning.

Quarterly Patterns

Citywide, Fiscal Quarter 1 (October–December) carries the largest total budget overspend of the year. At the department level, Police specifically shows its worst overspending in Fiscal Quarter 2 (January–March), suggesting a seasonal driver — such as winter overtime or holiday-period staffing — worth investigating directly with that department.
